

Astatine

At (At I). Strongest classified transitions below 2 μm (NIST): 3 levels, 2 lines.

At⁺ ionisation limit 75150.80 cm⁻¹ = 9.31751 eV (133.066 nm)

Arrow label: vacuum wavelength | reduced dipole moment
Matrix elements are measured or NIST values; * = measured
Arrow width grows with the Einstein coefficient A. D = dipole moment
Level caption: NIST energy and measured lifetime (s)
